

Cut excess energy usage and reduce costs with GridPoint – exclusively from Bell.

Bell is the exclusive Canadian carrier to offer GridPoint, a data-driven energy management solution that enables you to optimize energy consumption and cut costs. Using cloud-based software and an intelligent mobile app, GridPoint offers real-time visibility, monitoring and control of energy usage across multiple sites so you only use the energy you require, when it's needed.

Use real-time data and automated controls to optimize energy consumption.

Adjust building operations and eliminate excess energy usage.

Analyze changing site conditions and instantly respond by turning off lights, and adjusting the temperature and humidity settings remotely.

Easily monitor all your assets.

Make timely and more-informed decisions with real-time monitoring across all your assets – including HVAC, lighting, refrigeration and more.

Reduce time and money spent on monitoring.

Gather data from multiple sites using one convenient mobile app.

Collect real-time data from assets.

Gather the metrics you need to make more-informed expenditure decisions and extend equipment lifespans.

To see how you can run your business better with GridPoint from Bell, visit bell.ca/loT and request a callback from a Bell Business Expert.

Current as of November 1, 2018. (1) Based on a third party score (Global Wireless Solutions OneScore™) calculated using wireless network testing in Canada against other wireless networks of combined data, voice, reliability and network coverage.
